

Day of Service

South Jordan Area Saturday, September 11, 2021

South Jordan City is sponsoring three projects for our Day of Service

Storm Drain Grate clean up

9:00 - 11:00am

Cleanup does not require any special skills or lifting ability.

If you can clean up trash in your yard,
you can do this work.

Volunteers are expected to bring their own tools (gloves, shovel, broom, etc.). Trash bags will be provided by South Jordan City.

See below for options to sign up. Additionally, volunteers will distribute information on the new "Adopt a Storm Drain" initiative that South Jordan City is rolling out.

Litter Collection in the Bingham Creek Drainage on the North-side of the TransJordan Landfill

9:00 - 11:00am

Wind regularly blows paper and plastic trash out of the landfill and it litters the area around the landfill. The worst area is on the north side of the landfill in the Bingham Creek drainage area. The drainage is generally dry, but may have flowing water during heavy precipitation. The City would like to have the litter collected to improve the appearance and prevent litter from washing downstream.

Cleanup does not require any special skills or lifting ability - if you can clean up trash in your yard, you can do this work.

Volunteers are expected to bring their own tools (gloves, grabbers, etc.). Trash bags will be provided by South Jordan City.

Jordan River Parkway clean up

11:00 - 1:00pm

The heavy use of the Jordan River Parkway trail (along the Jordan River) results in the occasional need for trash to be picked up along the trail and surrounding area, to help keep our trail and river staying nice.

Teams will walk the trail, picking up trash. Volunteers are expected to bring their own tools (gloves, grabbers, buckets, etc.). Trash bags will be provided by South Jordan City.

There will be two groups of 25 people each, with one beginning at the Shields Lane Trailhead working south and the other beginning at the Riverfront Urban Fishing Ponds working north.
